Summary

To leverage my strong foundation in computer science, programming, and backend development, alongwith my growing expertise in AI, machine learning (ML), and large language models (LLMs) to build cutting-edge, intelligent systems . I seek opportunities in AI/ML development, backend engineering, and data-driven soft-ware solutions, where I can architect intelligent pipelines, optimize AI models, and drive impactful advancements in a fast-paced, collaborative environment.

Skills

JavaScript (Node.js), Python, HTML, CSS, SQL, Express.js, LangChain, Docker, OpenAI API, Prisma, Git, JWT, Postman, Datadog, Apify, MongoDB, PostgreSQL, Vector Databases (pinecone, FAISS, PostgresVectorDB), Server-Sent Events (SSE), REST APIs, Moment.js, OpenCV, Pandas, Scikit-learn

Education

B.Tech in Computer Science and Engineering

Chandigarh Engineering college, Mohali
2021 - 2025

Hobbies

Gaming, Reading, Travelling, Cooking

Certifications

- Cloud Operations
- Cyber Security Associate (Beginner),

Work Experience

VDoIT Technology

Sep 2024 - Present

AI/ML Developer

Gurugram, Haryana

Worked as an AI + Backend Engineer developing LLM-powered fitness and chatbot applications using OpenAI, LangChain, Node.js, and PineconeDB, with a focus on building scalable RAG-based backend systems.

- Engineered an AI-powered fitness platform that integrates seamlessly with wearable devices, leveraging OpenAI LLMs and LangChain to deliver personalized fitness recommendations and support real-time, natural language interactions with virtual trainers.
- Architected and deployed an intelligent AI chatbot backend capable of autonomous, context-aware conversations. Integrated Retrieval-Augmented Generation (RAG) techniques using LangChain and PineconeDB to ensure high-relevance dialogue continuity, while managing session state and memory in a scalable backend environment.
- Developed and optimized RAG pipelines across multiple production-grade applications by combining vector-based semantic search with efficient API orchestration. Used Prisma and PostgreSQL for persistent storage and ensured low-latency retrievals through PineconeDB integration.

makes360

Jun 2023 - Dec 2023

Student Intern (Creative Head)

Mohali, Punjab

Became proficient in industry-standard tools like Adobe Premiere Pro and Photoshop, enabling me to create impactful and visually engaging content

- Collaborated on multimedia projects by editing videos, designing graphics, and enhancing visual storytelling, ensuring brand consistency and audience engagement across digital platforms.

Projects

Hand-sign Language detection

2023

Developed a real-time sign language recognition app using computer vision and deep learning.

- Optimized model performance and accuracy by implementing data augmentation techniques and fine-tuning hyperparameters using openCV and CNN models, resulting in improved real-time gesture classification.

Used-car price Detection

2024

Built a machine learning model to predict used car prices in Indian metro cities using features like brand, fuel type, kilometers driven, and ownership history.

- Conducted extensive data cleaning, preprocessing, and data analysis on a comprehensive dataset
- Applied regression techniques and feature engineering to improve accuracy and gain market insights.
